

AUXILIARY LINES FOR DRILLING RISER

CHOKE & KILL LINES, MUD BOOST LINE

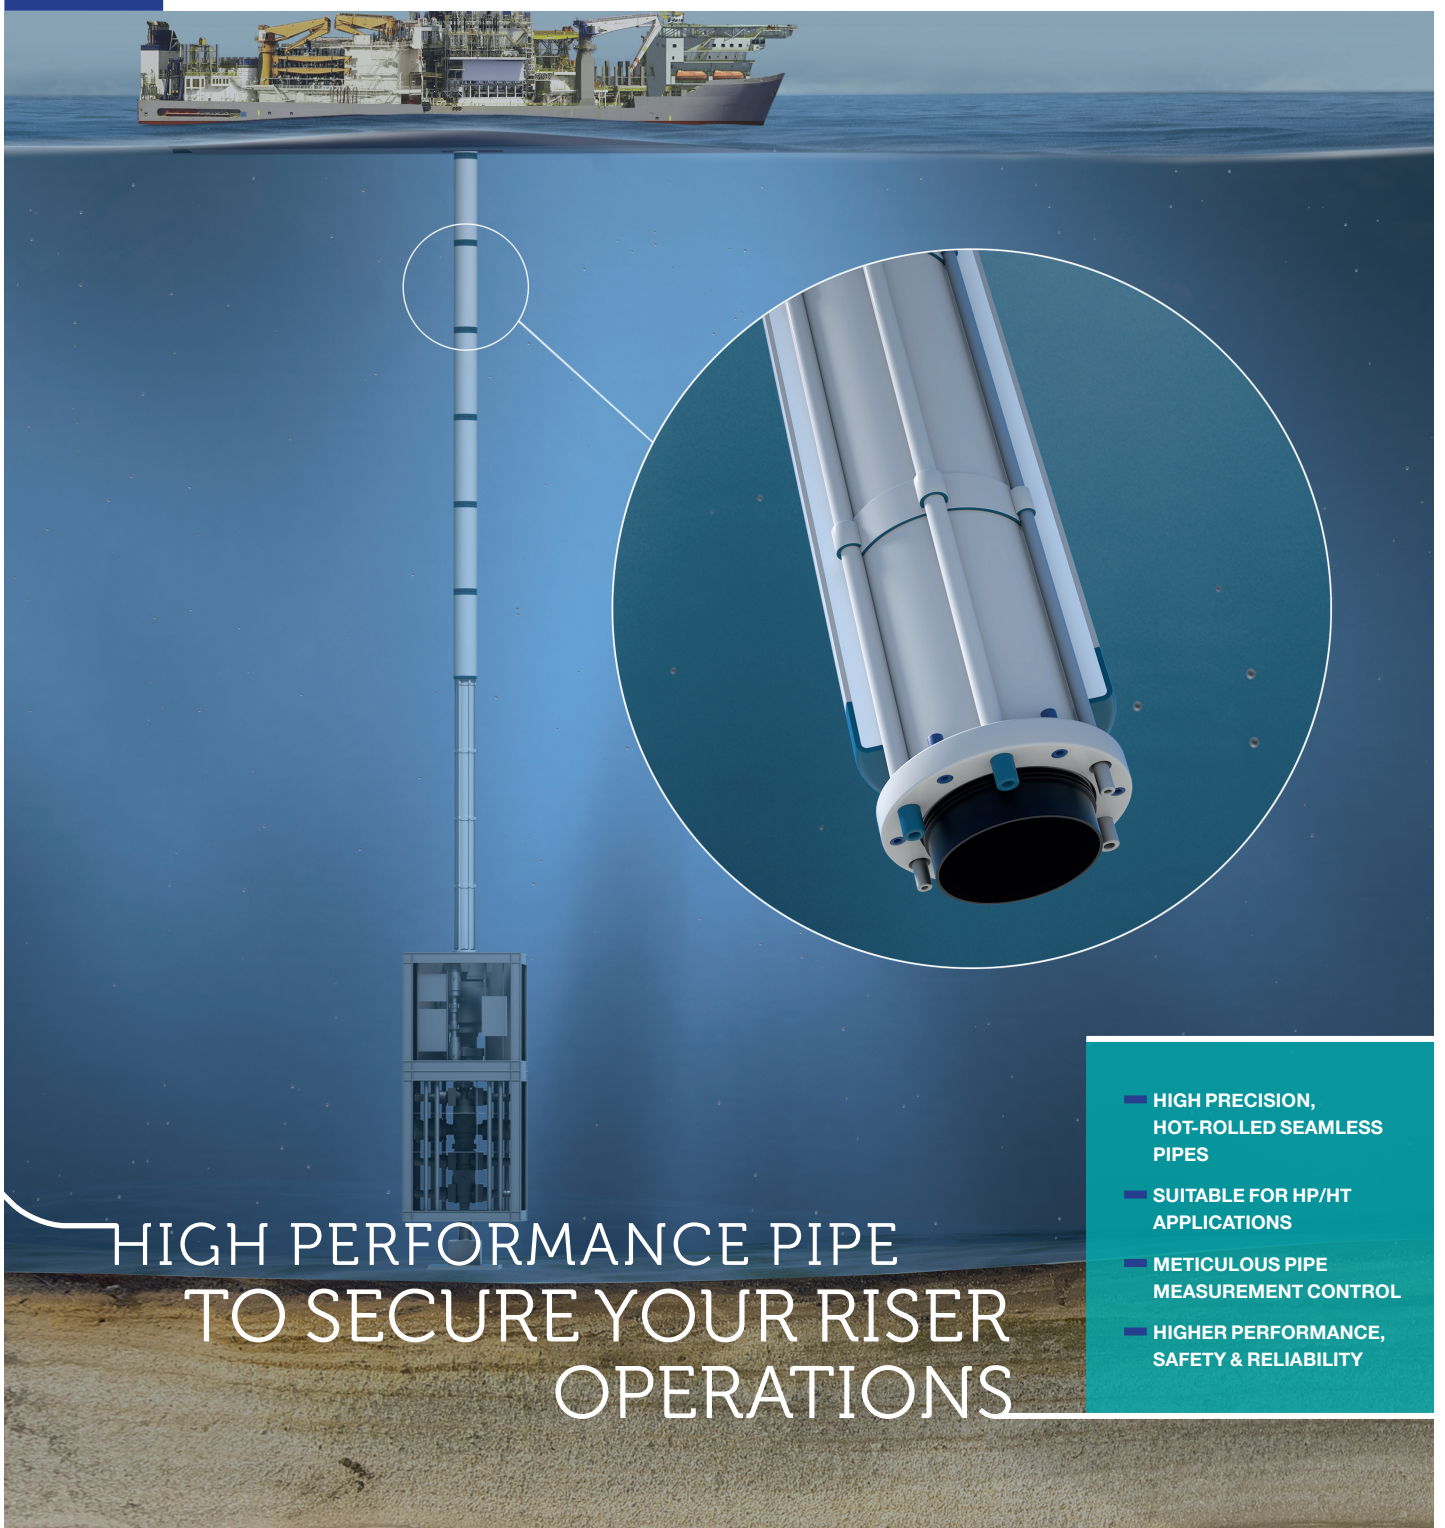

CUSTOMIZED
TIGHT
TOLERANCES

FULL
RANGE

COST
EFFECTIVE

HIGH PERFORMANCE PIPE
TO SECURE YOUR RISER
OPERATIONS

- HIGH PRECISION, HOT-ROLLED SEAMLESS PIPES
- SUITABLE FOR HP/HT APPLICATIONS
- METICULOUS PIPE MEASUREMENT CONTROL
- HIGHER PERFORMANCE, SAFETY & RELIABILITY

CHALLENGES

Auxiliary lines are an integral part of offshore drilling riser joints and need to combine fatigue resistance, high strength and weldability.

Choke and kill lines are pressure lines giving access to the well bore including when BOP is closed.

Fluid can be pumped into the kill line and gas can be flowed out of the choke line. Mud boost lines are used as conduits for drilling fluid which is pumped into the riser just above the BOP stack to increase annular circulating velocities. In all cases, safety is paramount.

CUSTOMIZED TIGHT TOLERANCES

Tailored dimensions to reduce weight and optimize fatigue.

FULL RANGE

Auxiliary lines are available in a full range of dimensions to meet all customer requirements.

COST EFFECTIVE

A competitive offer combining high quality and reliability.

MATERIAL

Yield strength:

75-85 ksi

Grade: 4130

Weldability

CE < 0.75

PERFORMANCE

Excellent geometry (ovality & eccentricity)

Consistent mechanical properties

Excellent pipe strength

Good weldability

SOLUTIONS

We offer high-strength low-alloy steel seamless pipe for choke & kill lines and boost lines with consistent mechanical properties and tight dimensional tolerances to ensure safe drilling operations. Our auxiliary lines can meet the most challenging environments including 20,000 psi BOP for deep offshore and HPHT applications.

PRODUCT

- Comprehensive range:
OD: 2 1/2" to 7 1/2"
WT: 0.5" to 1.5"
- Tailor-made dimensions for specific requirements

- Fixed length
- Tolerances: down to +/- 6%

RELIABLE AUXILIARY LINES FOR YOUR SUCCESSFUL DRILLING RISER OPERATIONS

Boost line
