HIGH TENSION & MAXIMUM CLEARANCE FOR SHALE

- SEMI-PREMIUM FLUSH CONNECTION
- INTERMEDIATE CASING
- HIGH TENSION CAPACITY

VAM® SPRINT-FJ

MAXIMUM CLEARANCE AND HIGH TENSION INTERMEDIATE CASING FOR SHALE APPLICATIONS

VAM® SPRINT-FJ, expanding our series of semi-premium products for the shale market, is a flush connection covering the high clearance demands of many shale plays, combined with an ultra high tension rating to allow operators to reach deeper depths with intermediate strings.

PERFORMANCE

- Highest tension capacity in a flush connection
- Easy running with less turns-to-make up, torque-turn monitoring not required
- Fit-for-purpose testing protocol designed for intermediate strings

APPLICATIONS

- High clearance to allow running of multiple intermediate-strings
- High tension capacity to allow deeper setting of intermediate strings

PRODUCT RANGE

OD: 7-5/8", 8-5/8", 8-3/4"

Grades: Carbon Steel, including Sour Service and Enhanced API grades

YS: From 80 to 125 ksi

Flush connection for highest clearance needs

BEST VALUE

— The most cost-effective solution for high clearance with maximum performance.

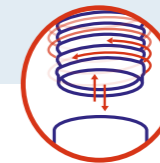

IDEAL FOR INTERMEDIATE STRINGS

— Flush design combined with ultra high tension and torque capacity, to allow multi-string design.

FAST AND EASY RUNNING

— Fast running with fewer turns to make-up thanks to the tapered dovetail thread design, combined with knurl marks on the pin to confirm make-up without torque-turn monitoring.

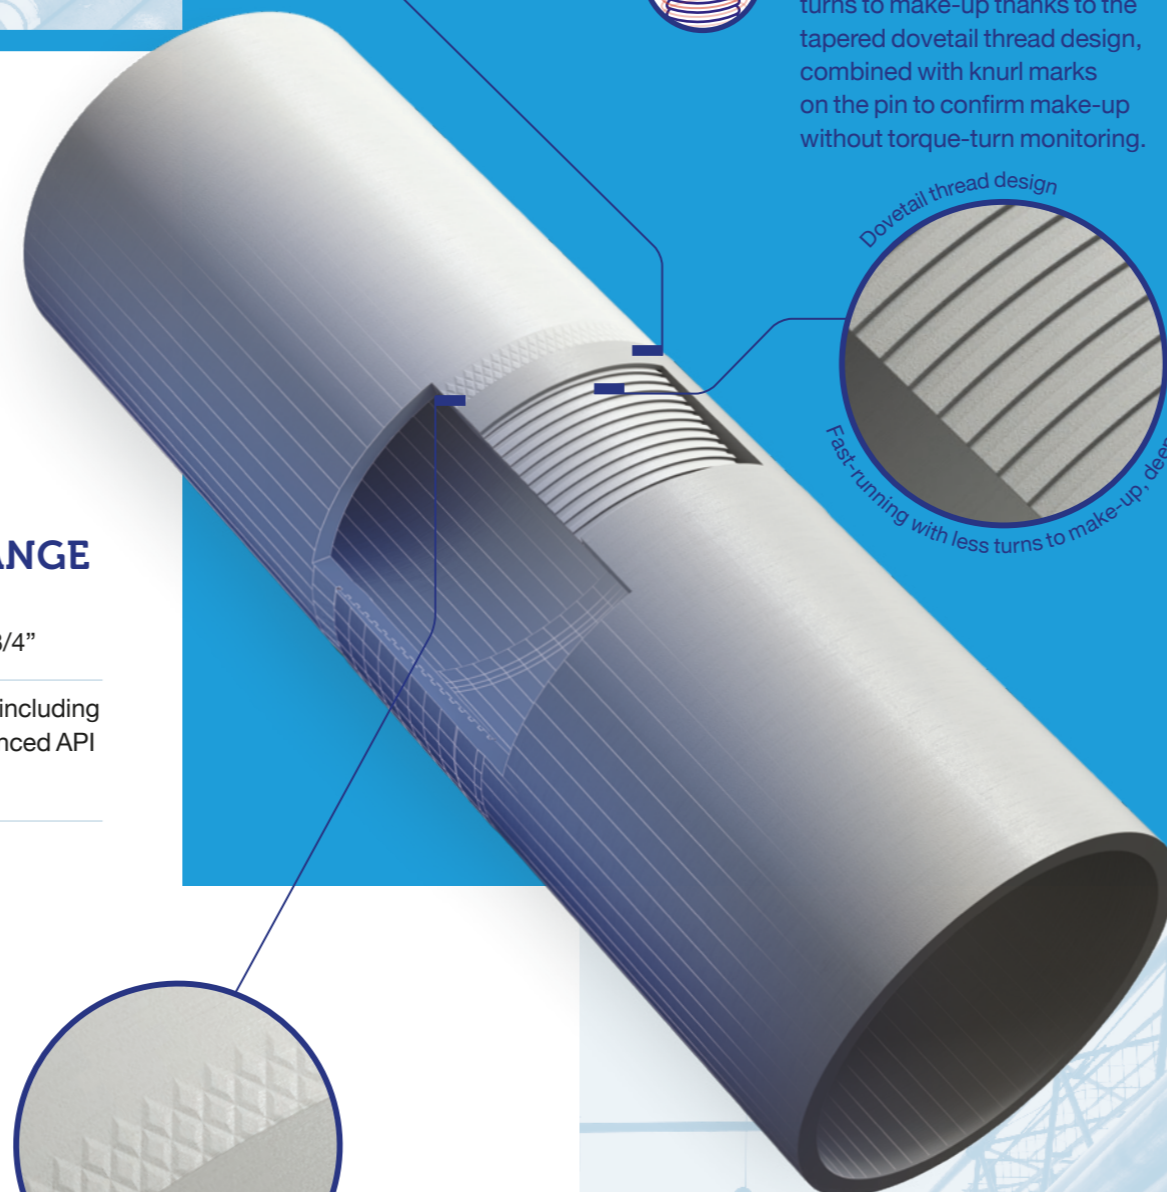

HIGHLY EFFICIENT RUNNING

— With make up to position and lower number of turns, VAM® SPRINT-FJ can be run at least 25% faster than other flush connections in the market.

SIMPLER OPERATIONS

— With high tension efficiency of 80%, VAM® SPRINT-FJ allows operators to set intermediate casings at least 2,000 ft deeper, without the need to crossover to T&C connections on top of the string.

Dovetail thread design

Fast-running with less turns to make-up, deep stabbing

Knurl marks on pin for easy make-up

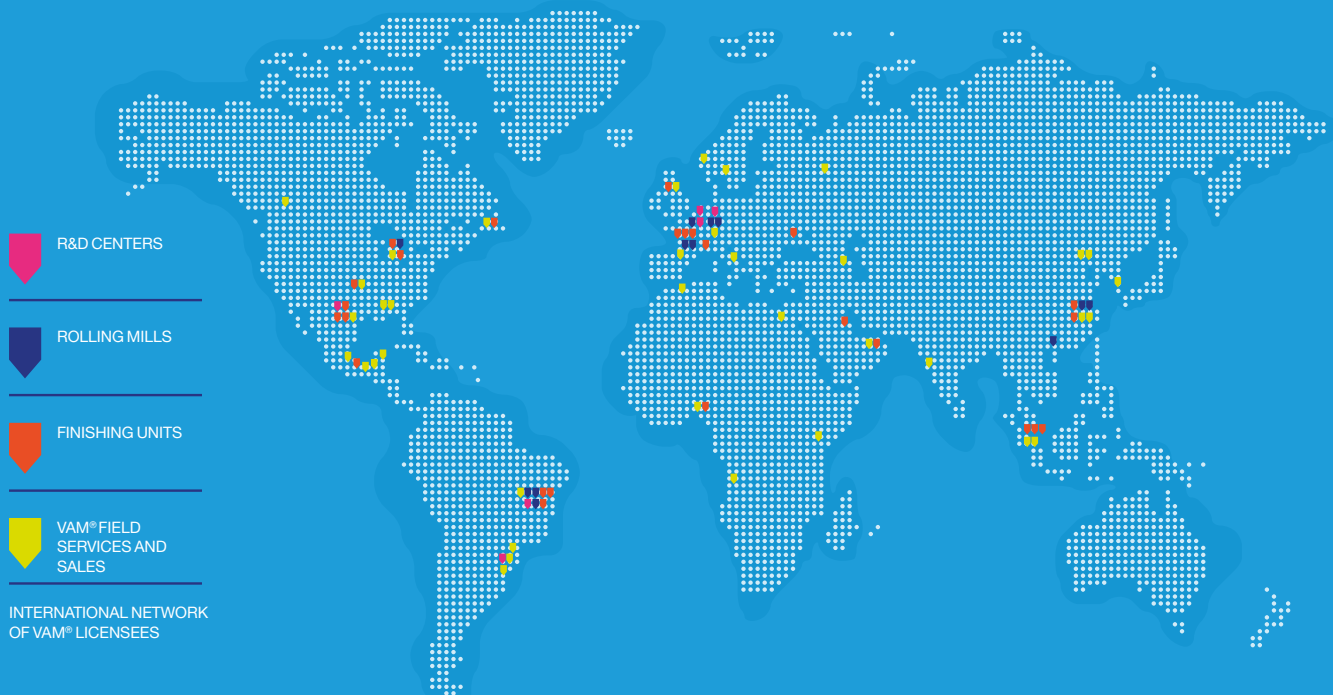

VAM® ANSWERS THE NEEDS OF US OPERATORS WITH A ONE STOP DOMESTIC SOLUTION

Responding proactively to the needs of US shale plays, VAM® developed a connection that combines maximum clearance with the highest tension rating in the market, together with the most competitive cost-effective solution.

Highest quality in manufacturing and connection performance is guaranteed by Vallourec's state-of-the-art seamless pipe mill capabilities and excellence in connection design and testing protocols.

YOUR PARTNER, SETTING THE PACE FOR INNOVATION AND PERFORMANCE EVOLUTION
