UNIQUE SOLUTIONS
TO MEET ALL
YOUR NEEDS

PROPRIETARY GRADES
FOR HIGH TENSILE
AND EXCELLENT
TOUGHNESS

LARGE PORTFOLIO FOR ALL REQUIREMENTS

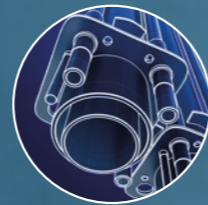

We supply seamless mechanical tubing for a wide range of vital components in the Oil & Gas industry. Whether it's for exploration, drilling, completion or well servicing and repairs, Vallourec mechanical tubing is used in a variety of oil field equipments such as choke & kill, well heads, liner hangers, packers and fracking tools.

From standard to customized sizes, we offer the largest size range of seamless pipe with wall thickness up to 3" (76 mm). We have a complete portfolio of steel grades, used and approved by all major Oil & Gas companies, including proprietary high yield grades - up to 175 ksi - as well as sour service and high alloy grades for improved performance in corrosive environments.

- Tight dimensional tolerances** close to machined requirements to reduce machining time and lower costs.
- Proprietary steel grades** for excellent toughness (down to -60°C), hardness (e.g. 480-530 HB), yield strength (up to 175ksi) and corrosion resistance.
- Leading manufacturer of **heavy wall pipe** thanks to our steel chemistry know-how, our pipe rolling and heat treatment expertise.
- Shaped pipes** with geometry variations along the pipe for integrated accessories thanks to **our unique pipe forge**.

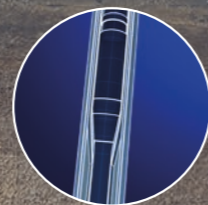

Typical applications for Oil & Gas Mechanicals

CHOKES & KILLS
Tight tolerances, excellent geometry (ovality & eccentricity), good weldability

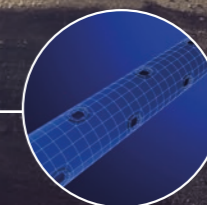

WELLHEAD/BOP
Excellent toughness
Heavy wall pipes

LINER HANGERS
Special grades for expandables
High yield grades (up to 175ksi) for deep offshore

PACKERS / SLIDING SLEEVES
Tailor made sizes to reduce weight and save machining costs

PERFORATING GUNS
High performance tubing, precision engineered for successful perforating operations

Our tubular products can be used in the most challenging environments. With our international footprint, our specialized manufacturing facilities and our commitment to excellent customer service, we can provide solutions to meet all your needs.

Thanks to our material expertise and manufacturing know-how, we can provide innovative solutions to reduce the weight of equipment by more than 20%. We can even work with you at the design stage to tailor tubular solutions to meet your specific challenges.

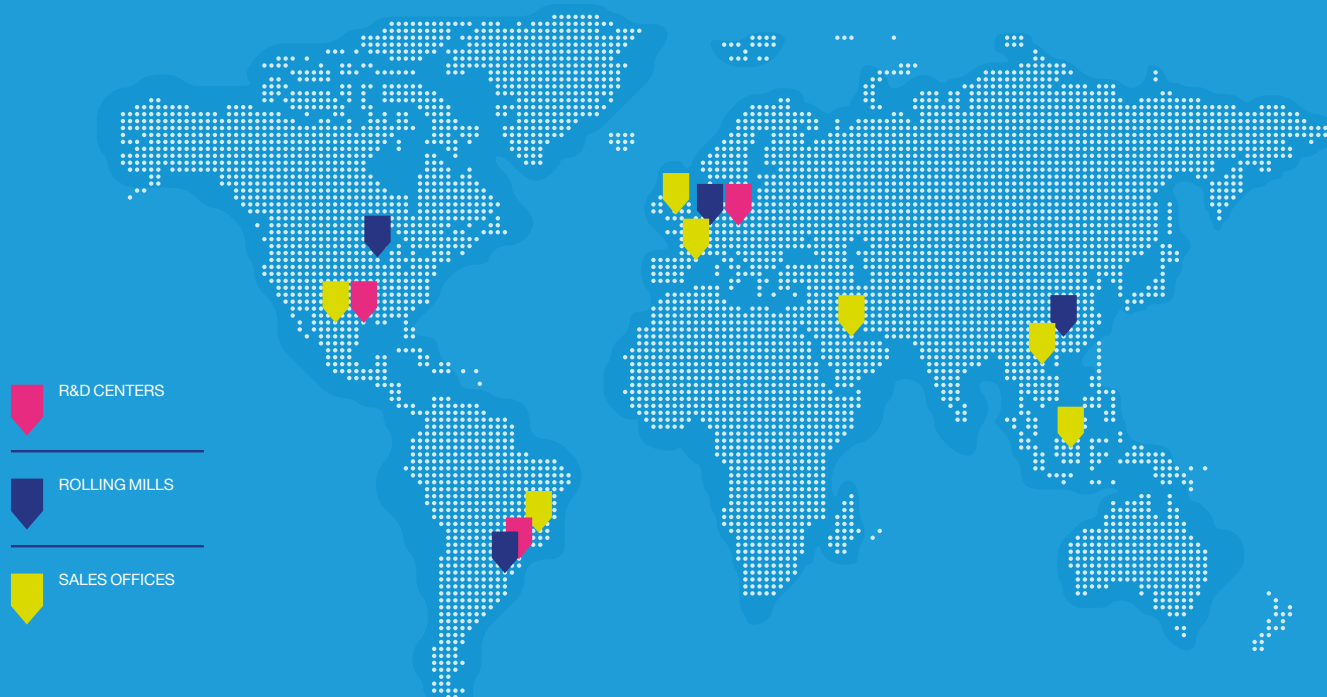

- Standard and non standard** sizes and grades available in longer pipe lengths. We guarantee a competitive offer with high quality and reliability.
- We can provide technical support** to help you select the right materials and develop products designed to save both time and money without compromising safety and quality.
