ENHANCED  
HEALTH  
& SAFETY

THE DOPE FREE SOLUTION  
FOR PROPRIETARY  
VAM® CONNECTIONS

- REPLACES STORAGE & RUNNING COMPOUNDS
- TESTED TO INDUSTRY'S HIGHEST STANDARDS
- EASY RUNNING AND FAST MAKE-UP
- FULLY COMPATIBLE WITH REGULAR DOPE ENDS AND ACCESSORIES

## CLEANWELL®

CLEANWELL® is a non-polluting, multi-function coating replacing both storage and running compounds. Applied on the surface of VAM® connections in Vallourec mills, it provides outstanding anti-corrosion and lubrication properties.

## TECHNOLOGY

**CLEANWELL® technology relies on two key features:**

- An anti-corrosion and anti-galling metal-plated layer, delivering proven storage resistance
- A thermoset lubricant, providing extreme repeatability and stability during make-up

## PRODUCT RANGE

**CLEANWELL® has been qualified according to the industry's most demanding protocols, including API RP5 C5:2017 CAL-IV and ISO13679:2019 CAL-IV.**

- Available for VAM® 21, VAM® SLIJ-3, VAM® HTTC in sizes from 3-1/2" to 16"
- Available on other VAM® connections upon request
- Carbon Steels including SS grades, 13Cr, S13Cr and Corrosion Resistant Alloys
- Yield Strengths from 80 to 125 ksi

## APPLICATIONS

**CLEANWELL® is designed for a wide range of Casing, Liner and Tubing applications**

- Offshore wells
- HP/HT wells
- Deviated wells
- New Energies: CCS, Hydrogen & Geothermal
- Deep and ultra-deep wells

## PRODUCT BENEFITS

CLEANWELL® is fully compatible with regular dope ends and accessories, enabling operators to improve inventory management and boost their performance:

- Up to 30% faster running time
- Near-zero rejections & back-outs
- Improves health, safety & environmental impact
- Significant cost savings throughout the pipe lifecycle

**A RIG-READY SOLUTION THAT REDUCES HANDLING, INCREASES SAFETY & LOWERS OPERATING COSTS**

## PROVEN SUCCESS IN THE MIDDLE EAST

In the Middle East, CLEANWELL® was successfully run for an operator in several types of High Torque Liner application. In total, over 1,500 joints, equivalent to more than 18km, were prepared and run-in-hole with no rejects. Furthermore, the coating presented remarkable stability during make-up.

According to the operator, "CLEANWELL® saved us time during running, with very few breakouts. It also provided excellent gas-tight sealing."
