OPTIMIZING RIG DELIVERY WITH THOROUGH STOCK MANAGEMENT

YOUR ONE-STOP-SHOP FOR PIPE STORAGE AND SHIPMENT

Our yard inspection services follow a comprehensive checklist, covering every aspect of quality and performance, and are customizable according to a customer's needs. A crucial part of our offer, which makes our pipes fully ready to be run, is that Vallourec can replace storage dope with running dope before pipes even leave the yard. With TMS, clients need only install our rig-ready pipes, and their wells are up and running.

When running pipes in a well, any delay can result in exponential cost increases. Leveraging our expertise and 30+ years of experience, Vallourec's Tubular Management Services help customers optimize pipe yard storage, transport to and from the rig, and inspection. Whether managing inventory at a customer yard, or at our own facilities around the world, our field and digital solutions streamline the most complex installations. Our aim is to ensure full reliability and traceability from yard to rig.

RECOGNIZED SERVICES AT EVERY STAGE

RELIABILITY

From quality inspections to timely transport and delivery, operators can count on us.

REDUCED WORKING CAPITAL

Ensuring quality from the yard to the rig means customers get what they need, with no leftovers.

HIGH SAFETY STANDARDS

Yards are supervised to the highest international safety and quality standards.

OPTIMIZING PROJECTS AROUND THE GLOBE

United Arab Emirates

An operator with extensive inventory (over 100,000 metric tons) wanted to outsource yard management to reduce logistics and avoid costs due to overstocking. The company also wanted access to reliable data on its stock level across all its yards. Since 2020, Vallourec has supported the customer with global yard management services and our rig-ready solution of replacing storage dope with running dope before pipes are shipped. We have received positive feedback on our efficiency and reliability.

Brazil

A Vallourec stockyard needed to optimize its management of a major customer's inventory to ensure faster and safer operations. Thanks to our digital field app, the rate of inventory counting and identification skyrocketed from 6 pipes per man hour to 91 pipes per man hour. Furthermore, increased equipment productivity resulted in savings of 50%, a major improvement for Vallourec and our customer.

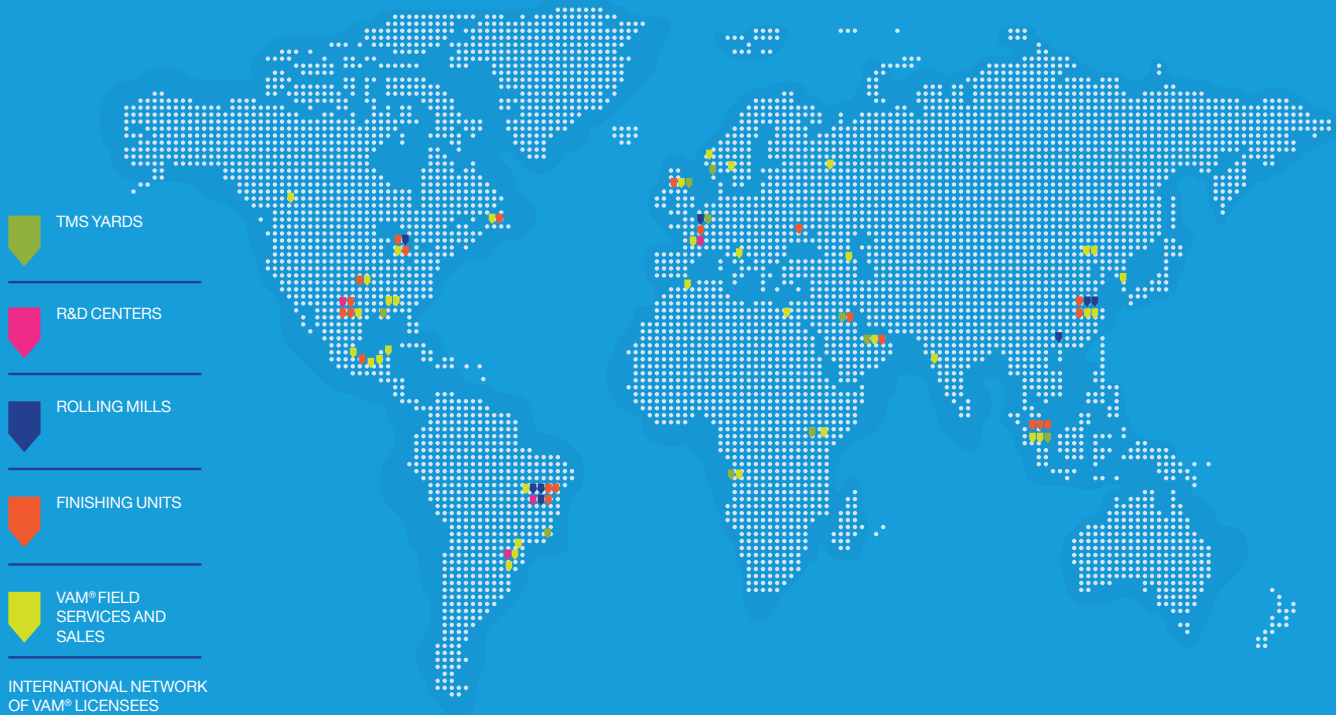

OUR CUTTING-EDGE ONLINE INTERFACE

- Inventory & stock management for 100% accuracy
- Traceability & data collection for full monitoring
- Yard operations support for optimal reliability
- Online stock visibility & analytics for total transparency

A CAREFUL EYE ON INVENTORY

- Guaranteed "First in, First out" stock rotation through optimized stock maintenance, logistics & handling
- Assured full inventory accuracy and data reliability thanks to cyclic inventory and pipe tallying
- Periodic maintenance, traceability checks and preservation of connections during long-term storage

YOUR PARTNER, SETTING THE PACE FOR INNOVATION AND PERFORMANCE EVOLUTION
