GLOBAL
SUPPORT

A COMPLETE
VAM[®] ACCESSORY
ECOSYSTEM

- FULL RANGE OF VAM[®] ACCESSORIES
- WORLDWIDE NETWORK WITH LOCAL THREADING
- OPTIMIZED MATERIALS FOR EFFICIENT MANUFACTURING
- DESIGN OF PROJECT-SPECIFIC VAM[®] CONNECTIONS

ENGINEERING & VAM® DESIGN

Turning VAM® expertise into custom solutions

Leverage Vallourec's extensive VAM® expertise to accelerate product development.

ACCELERATED EQUIPMENT DESIGN

Benefit from decades of VAM® qualification data, engineering expertise, and advanced design capabilities, including for internal tool connections, to shorten development cycles and accelerate time to market.

COMPLETION STRING INTEGRITY

Ensure end-to-end completion integrity with VAM® connections engineered to deliver consistent performance throughout the production string, including critical interfaces within completion equipment.

MATERIAL SUPPLY

Reduce machining costs with optimized material solutions

Premium material supply for accessory manufacturing, combining high-quality grades with flexible sizing and shaping options to reduce machining and increase design flexibility.

BASE PIPES

OCTG pipes threaded with VAM® connections, ideal for manufacturing accessories like sand screens or for use as spare pipes.

MECHANICALS

A wide range of heavy-wall pipes in sour-service premium grades, designed to replace Inconel, with customizable sizes and near net shape forging to minimize machining and manufacturing time.

- **Unique capability over 1 inch wall thickness** provides heavy-wall pipes for accessories
- **Material continuity** with same grades as on the OCTG string
- **Flexible ordering** from large series to small lots

- **Up to 80% cost savings** achieved by extrapolating from existing connection test data versus new connection qualification
- **5,000+ technical requests** answered annually via Mr Help support platform
- **~\$100M investment** per connection family to engineer, test and qualify to achieve market-standard status

VAM® THREADING SERVICES

Certified VAM® threading close to your operations

Access VAM® threading services for any accessory through Vallourec's global network, ensuring reliability, availability, and responsiveness.

Packers, valves, wellhead hangers, liner hangers

VALLOUREC THREADING NETWORK

VAM® threading is provided through 8 Vallourec workshops and a network of over 120 licensees worldwide.

THREADING CELLS

Certified Vallourec operators perform VAM® threading using dedicated equipment embedded within customer facilities, ensuring maximum proximity, control, and efficiency.

VALLOUREC OILFIELD ACCESSORIES

Unlock greater value in your operations with the VAM® standard

TURNKEY TUBULAR ACCESSORIES

Streamline your accessory supply chain

Vallourec supplies VAM® threaded tubular accessories qualified to the same standards as OCTG pipes, with delivery options tailored to customers' project planning.

Couplings, pup joints, nipples and crossovers

BUNDLED WITH PIPES

Accessories are ordered together with OCTG pipes ensuring streamlined purchase of equipment.

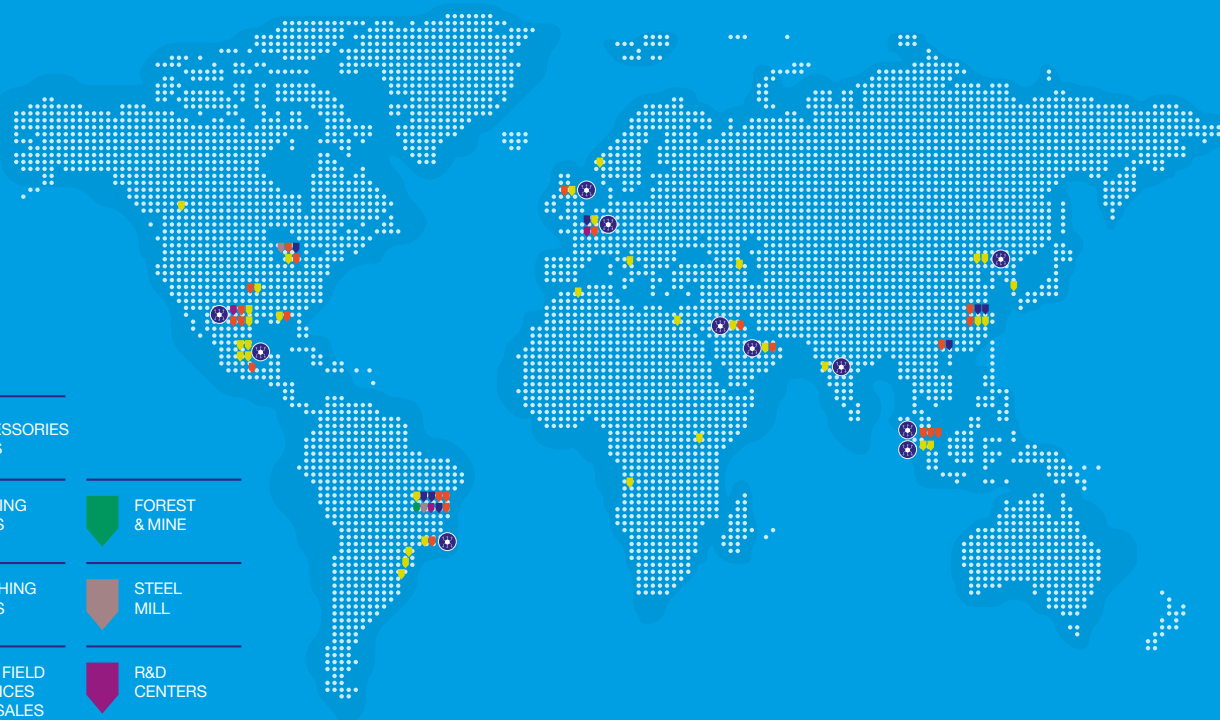

STANDALONE ORDERS

Accessories are ordered separately from OCTG tubulars and produced from stock material, enabling a rapid response to maintenance needs, spare parts requirements, and short-notice operational demands.

- **30% cost savings** when accessories are purchased bundled with OCTG pipe
- **Between 75 - 150 Accessories** required per well across the full supply chain
- **Fully compliant** with end-user specifications

- **Up to 30% cost savings** with an integrated threading cell compared to subcontracting
- **15 active** threading cells worldwide by 2027
- **60% shorter lead times** with on-site threading cells
